

## Protected from Circumcision

§18USC116

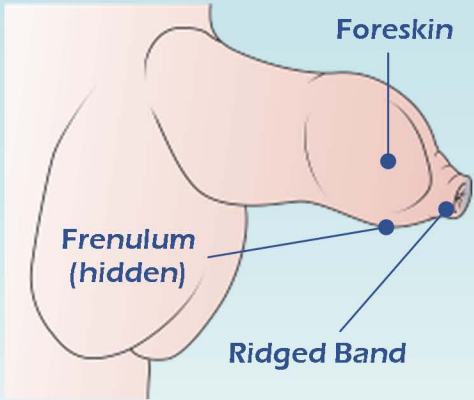

## NOT Protected from Circumcision

More than 1 million U.S. boys are  
forcefully circumcised every year.

**Please endorse the MGM Bill proposals and help protect boys from genital cutting.**

**Circumcision is medically unnecessary and damages a man's sexual function for life. Shouldn't it be his choice?**

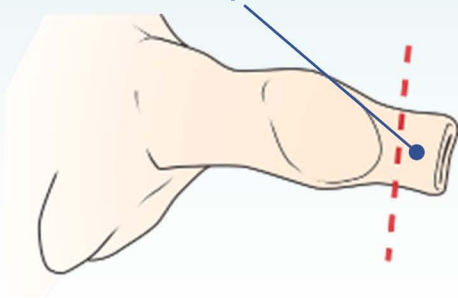

Our federal and state MGM Bill proposals would amend current FGM (female genital mutilation) laws to include protection for boys. You can encourage lawmakers to sponsor these bills by adding your organization's name to our list of endorsers at [www.mgmbill.org/endorsements.htm](http://www.mgmbill.org/endorsements.htm). To do so, please email us at [comments@mgmbill.org](mailto:comments@mgmbill.org) with your name, your group's name and contact information, and an authorized statement approving your group's endorsement.

*"Existing scientific evidence demonstrates potential medical benefits of newborn male circumcision; however, these data are not sufficient to recommend routine neonatal circumcision."*

**- AAP 1999 Circumcision Policy Statement; Reaffirmed in 2005.**
